

What's the topic?

(Differentiated)

The aim of this starter activity is for the pupils to identify the learning that will take place.

Pupils will need to be issued with a range of pictures related to the lesson content and will need to work out what the connection is.

To add additional challenge to this activity you could time it.

Once pupils have had time to look at the pictures they will then be randomly selected to feedback what they think. The class can then vote as to whether they agree.

Be aware that this is an activity designed to focus on the pupils and not teacher talk. Be concise in your explanation.

To differentiate using **GAP**:

To differentiate the pictures use a range to support (green) and limit the number of images to add challenge (amber). Finally consider blocking out parts of the image to create an even higher level of challenge (pink).

Green	To challenge yourself choose the 'Green' pictures.
Amber	To further challenge yourself choose the 'Amber' pictures.
Pink	To extend yourself choose the 'Pink' pictures.

OUTSTANDING LESSON PLANNING
